

**Phantom powered hydrophone amplifier with BNC connector input and XLR connector output - type : XLR48-30720**

Phantom Powered Hydrophone Amplifier with XLR connector suitable for any type of commercial mixing console or recording device.

Matches any type of passive hydrophone with BNC connector.

Operates on standard XLR phantom power 24volt or 48 volt.

High signal output due to high supply voltage.

Frequency range from 20Hz to 700kHz. Gain 30dB.

We recommend the Teledyne-Reson TC4033 or TC4034 hydrophones to match this amplifier.

We recommend the ZOOM type H4 handheld digital recorder for frequencies up to 40kHz or the ZOOM type UAC 2 for higher frequencies up to 80kHz.
